You hear the thundering explosions, see the women and children being terrorized, and know that some dark maniacal evildoer is just around the corner. However, you're calm, because you have faith in the saving powers of Bruce Willis. It's true; in many a wide-screen adventure, Bruce Willis has swept in to set things right in just the nick of time. Jurgen DeBlonde, aka Köhn, holds this truth near and dear to his musical heart and has decided to pay homage to this hero of heroes with a six song EP. The six tracks together with the artwork created by Köhn, complete his portrait of the heroic heartthrob.

The *Bruce Willis*. EP by Köhn is the fifth installment of the Western Vinyl portrait series, which has included Bonnie Prince Billy, Papa M, Appendix Out, and Anomoanon, and is scheduled to include others such as Robert Lippok and Mick Turner. In the portrait series, artists provide a portrait in the form of a photo, drawing, painting, etc along with two or more songs about, inspired by, or from the point of view of the individual in the portrait.

Also available from the portrait series by Western Vinyl:

ANOMOANON - *Portrait of John Entwistle 10"* (Western Vinyl) WV19

PAPA M - *Songs of Mac* CDEP (Western Vinyl) WV14
