Long awaited re-issue of **The Olivia Tremor Control's** ambitious, highly influential second album from 1999. Perfect symphonic pop songs in an elaborate tapestry of tape manipulation, free jazz, and electronics. Guest appearances by **The Apples (in Stereo)** and **Neutral Milk Hotel**.

"Pop at it's most playful and the avant-garde at its cuddliest – a 27 song trip in which structure and chaos keep leap-frogging each other. Dedicated headphone junkies should be thrilled with the deep focus production and tidal wave of melody. Even the most elaborate concept albums can be fun." – **Rolling Stone**

"The Olivia Tremor Control are truly WONDERFUL!! Really interesting and different. I'm so sick of hearing bands that all sound the same and the guys were so delightful that I actually watched their whole set! I NEVER listen to opening bands but this band was something else!!" – **Moe Tucker of the Velvet Underground**

"The sound of timeless songwriting intersecting ancient folk orchestras in the labs of the great musique concrete pioneers." – **The New York Times**

"The Olivia Tremor Control do not disappoint, if psychedelia is back, this is how it should be." – **Mojo**
